

Billy Jes

+6282198094387| billysorong112@gmail.com | Sorong, Southwest Papua, Indonesia

Profil

Full-Stack & AI Engineer and Informatics Engineering graduate focused on web application development and AI feature integration. Experienced in building end-to-end projects using the JavaScript/TypeScript, Python, PostgreSQL, and Supabase ecosystems. Holds a research background published in SINTA-accredited journals, with proven experience leveraging modern technologies to efficiently transform complex ideas and logic into production-ready applications.

Education

Universitah Muhammadiyah SorongSorong, West Papua

Bachelor of Informatics Engineering — GPA: 3.81 / 4.00, Cum laude2022 – 2026

- Lead Author of 2 Nationally Accredited Scientific Journals (Sinta 2 & Sinta 5)

Work Experience

Sorong Timur District Office, Sorong City — Sorong City, Southwest Papua, IndonesiaJul 2025 - Sep 2025

Web Development

Web Development

- Designed and built a responsive web-based profile website for the Sorong Timur District Office (mobile & desktop).
- Structured the navigation and public information content, such as agency profiles, regional maps, organizational structures, and activity galleries.

TBM (Community Reading Corner) Development Team — Sorong City, Southwest Papua, IndonesiaNov 2025 - Jan 2026

Full-Stack Web Developer

- Designed and developed a web-based TBM system management platform using HTML, JavaScript, Supabase, and Vercel.
- Built a multi-role authentication system (Admin, Central Board, Regional, Local, and Member) for tiered data verification workflows.
- Managed and optimized the PostgreSQL database on Supabase and developed a responsive and interactive dashboard.

Projects

ConsoleFix - AI JavaScript Error Solver |2026

- Automatically detects exceptions and runtime errors directly from the browser console.
- Provides root cause analysis along with ready-to-use code fix snippets from Google Gemini AI.
- Officially published on the Google Chrome Web Store.

AirCheck - AI Air Quality Expert System |2026

- Air Quality Prediction (Good/Moderate/Unhealthy) based on Naive Bayes Algorithm.
- Natural Language Processing (NLP) & Indonesian Stemming (Sastrawi).
- Voice Input Support (Speech-to-Text) & Interactive Health Recommendations.
- Live Full-Stack Serverless Deployment on Vercel Platform.

CelerySens - AI Diagnosa & Perawatan Tanaman Seledri |

2025

- Symptom analysis of typical pests and diseases in celery plants (*Apium graveolens*).
- Google Gemini Flash API integration for technical, organic, and chemical solution recommendations in line with agricultural science standards.
- Equipped with Speech Recognition (Voice Input), Text-to-Speech, and instant consultation result copying.

NewsGeo - AI Geospatial News Intelligence Platform |

2025

- Automated Geocoding & News Mapping: News location detection and interactive map visualization.
- Smart AI Summarization (NLP): Fast and automated news core summary extraction.
- Firebase Authentication: Secure authentication integrated with Google Sign-In & Email/Password.
- Role-Based Access Control: Membership system (Free vs Premium Member) synchronized in Cloud Firestore.

Core Skills

- **Programming Languages & Frameworks:** HTML, CSS, JavaScript/TypeScript, PHP, Python, Node.js, Next.js, React.js
- **Databases & Tools:** MySQL, PostgreSQL, Supabase, Firebase, Vercel, Git, Colab, Kaggle
- **AI/ML:** PyTorch, TensorFlow, OpenCV, CNN, YOLO, DeepSORT, Transfer Learning, Fine-tuning, RAG, LLM integration

Achievements / Certificates

- **Responsive Web Design Developer Certification - freeCodeCamp (2026):** Responsive web development training using HTML5, CSS3, Flexbox, and CSS Grid.
- **Python Developer Certification - freeCodeCamp (2026):** Python programming, data structures, and algorithm-based problem-solving training.
